Summary

Strongly detail-oriented person with a love for organization and eager to apply those skills to web development. I am excited to continue to grow my web development skills and am looking for employers who make my continued learning a priority. Ideally, I'd like to work on a team of developers who enjoy their craft, are building interesting software, and who are open to mentoring and developing new talent. I am an eternal student and it's exciting to me that there is so much out there to learn, and I look forward to continuing to add to my skill set for many years to come.

Projects

FITLIFE

FitLife is a fitness eCommerce site designed to help those looking to learn how to eat properly, get healthy and lose weight. Meal plans are offered for both men and women. Look for workout plans coming soon! This project was made with the MEAN stack(JavaScript, jQuery, Node, Express, Angular, MongoDB)
