Projects

FITLIFE

FitLife is a fitness eCommerce site designed to help those looking to learn how to eat properly, get healthy and lose weight. Meal plans are offered for both men and women. This project was made with the MEAN stack (JavaScript, jQuery, Node, Express, Angular, MongoDB)

Demo: <http://fitlifeforlife.us:5000/#/>

GETCOHORT

GetCohort is a Coding Bootcamp app built to showcase each student's projects, contact info, links to portfolio, github and LinkedIn sites. Week long project built with a scrum team of four developers using agile development methodologies. Technologies used: HTML/CSS, Python, Flask, PostgreSQL.

Github: <https://github.com/DigitalCrafts-September-2016-Cohort/GetCohort>

Demo: <http://54.148.11.254/> (for testing - user: juan.cortes@gmail.com | pass: 1)

PIXEL ART MAKER

Pixel Art Maker is a single page web app that lets users draw a pixel image on a customizable panel. Users can create their own grid size, choose their own color(s), fill the entire grid with a single color, and drag colors to create their own pixel art. Technologies used: HTML/CSS, JavaScript, jQuery

Github: <https://github.com/mccleary/Pixel-Art-Maker>
