ARCADE GAME

This game is played just like the Frogger game. You have a Player and Enemies (Bugs). The player has to move from the grass, across the street to the water without colliding with a bug. Reach a score of 10 to win the game. Technologies used: HTML/CSS, Canvas, Object-Oriented JavaScript

MEMORY GAME

Memory Game is a single page web app card matching game. The game board consists of sixteen "cards" arranged in a grid. The deck is made up of eight different pairs of cards, each with different symbols on one side. The cards are arranged randomly on the grid with the symbol face down. The gameplay rules are very simple: flip over two hidden cards at a time to locate the ones that match! Technologies used: HTML,CSS and JavaScript, Google Fonts, W3 Modal, Font Awesome
